

# QH711

## SOLUTION

Application for tractor, harvester, sprayer

# R-1W

- **Improved traction.**

The new developed tread with richer patterns and wider width bring more strength to your agricultural machines and enhance efficiency for your work.

- **Longer tire lifetime.**

Forerunner developed a high-performance rubber compound and significant strong structure. With this advantages, the tire will last for a longer lifetime and save much more cost.

Forerunner's tire radial structure with wider tread can effectively reduce the soil compaction caused by heavy agricultural machines.

- **Less soil compaction.**

SIZE	SERVICE DESCRIPTION LI/SS	OVERALL DIAMETER (MM)	SECTION WIDTH (MM)	STANDARD RIM	MAX LOAD (KG/LBS)	INFLATE PRESSURE (KPA/PSI)
